Report from the
international
meeting of
students

8-14.12.2019

Małkinia Górna, POLAND

Using Mobile Apps in the learning process is a new project that our school is engaged in. It is aimed to 14-year-olds and older students and will last for two years. The partner countries are Italy, Portugal, Turkey and North Macedonia. The main objectives are to promote the use of technology in the learning process and to introduce innovative methods and tools for students assessment. During the project there will be five meetings in every partner country and ten Mobile applications to be used in the learning process will be presented. The first meeting took place in Małkinia Górna, Poland. Here are some articles about the main activities and some students opinions. Enjoy your reading 😊

Kahoot workshop

On the first day of the project I took part in Kahoot workshop. Kahoot is an application that helps students to create quizzes. We worked in groups and we were doing quizzes about our countries and educational systems. Each country had it's own group. Later we checked our knowledge in a competition with other teams. It was a great fun!!!

Later after workshop we participated in integrating games and activities to get to know each other better. It was the highlight of the day!

Memories from Erasmus

Last month me and my family hosted a girl from Portugal. Her name is Leonor. She was very confident and talkative so I liked her right away. I met her friends and I actually know much more facts about her homeland and what she is interested in. After a few conversations we noticed that we are similar because we watch the same series and we have similar opinions on many topics. We keep in touch and I would never forget how great time with her and other people from project I spent. I hope that we will meet once again one day.

Trip to Warsaw

On the third day of the meeting we and our guests had the opportunity to visit capital of Poland- Warsaw. First point of day was a Copernic's Science Centre. We saw there a lot of interesting experiments as well as scientific exhibitions. This place really impressed and interested our guests. Next we went to the Złote Tarasy shopping center for a lunch and moment for rest. After meal and short shopping we moved to the Warsaw's Old Town. We could see monuments such as Royal castle, Bazylika św. Jana or Warsaw's main market. The Old Town in the time of our visit was beautifully illuminated, what let us know about the upcoming Christmas! It was a nice day.

Memories from Erasmus

One month ago we hosted a boy from Turkey. It was a very interesting experience. His name is Oghuzan. He was very friendly, kind and sociable. In the evenings we always played computers games on games console. On Wednesday our guest tried to make Turkish coffee and we almost burned the kitchen but it was delicious. My mum and dad talked to him about his country. We stay in contact with him and his family. It was an unforgettable experience. We miss him so much.

Flipped Classroom workshop

On Wednesday, December 11, we took part in Flipped Classroom workshop. The Organisers of that workshop were teachers from Italy. It consisted of the presentation with a film that showed us instructions on how to proceed with next steps and the exercises to do. The tutorial film was related to triangles, calculations and angle measuring. First, we watched it and after that had to do some exercises. We worked in international groups: students from Portugal, Italy, Turkey, North Macedonia and Poland all together. During that workshop, to make our time better, we were offered sweet gingerbread cookies. Each of us had a good time and it was a new experience for everyone.

Memories from Erasmus

Project Erasmus + taught me a lot of English skills but also I could meet a lot of very friendly people. My family hosted a boy from North Macedonia. His name is Branko. It turned out that we have a lot in common and share the same interests. We still keep in touch. This Erasmus project was an amazing experience and it thought me a lot of things. I am sure I can recommend it to everyone.

Polish cuisine workshop

Durning Erasmus+ project I took part in cookery workshop in technical school im.

Stanisława Staszica. At the beginning we watched the presentation about Christmas Polish dishes and we watched film about this school. It was very interesting. Later we were divided in international groups and we started making traditional dumplings with cabbage and mushrooms. When we finished, students and teachers had the opportunity to taste our dumplings and other Christmas dishes. I think it was a great workshop! Everyone had a lot of fun!

Memories from Erasmus

Our guest was Engëll from North Macedonia. In my spare time, we talked a lot and we played cards. He told me about his daily life and ways of spending free time. My family was very happy that we could have a foreigner in our house. I think hosting guests from abroad is an interesting adventure, everyone should try it!

Maria Barzyczak

Wordwall workshop

On the fifth day of the project I took part in the „Wordwall” workshop. It’s an application which enables students and teachers create quizzes and excersises to revise the knowledge. We created quizzes about Poland, e. g. trips to Polish cities - Warsaw and Białystok, Polish traditions or traditional Christmas dishes. There were also questions about the names of teachers coordinating the project or the first Polish capitals. Each group of students could present their own quiz. Before that, we could also do a short quiz about the countries from which our guests came from. The whole workshop was really funny, and it was definitely not a tedious and boring one!

Memories from Erasmus

I hosted a Macedonian girl. Her name is Vesa and she is 18 years old. She is older than me but we talked every evening about interests, families and schools. Macedonian group was very cool 😂 😎 these people were amazing and funny. Me and my friends keep a constant contact with them.

Trip to Białystok

On 12th December 2019, at 8 AM, Erasmus participants set off on a trip to Białystok. At 9.30 AM we were there. We started from the Old Town and the first place we visited was the Orthodox Church. The guide told us about this religion and the traditions. Then we went to the largest and the oldest Roman Catholic Church of Białystok. The guide showed us around this Church. The next point of the trip was a walk through the Old Town, visit at the Branicki's Palace and the Museum of Medicine. The last point of our trip was a visit to the Candy Factory, where everyone could make something sweet for themselves. We returned home at 9 PM. It was a really nice day. Everyone was enjoyably tired.
